Dear Redflag AI Hiring Team,

I'm applying for the Senior Software Engineer (Platform, Ruby on Rails) position. I'm a Staff Software Engineer based in Brazil with 14 years of experience building and maintaining production web applications, most of them in Ruby on Rails.

Why I'm a strong fit:

- **Rails, APIs and databases:** I've built Rails applications and REST APIs in production since 2012, with PostgreSQL, MySQL, Redis and Sidekiq. I've used TDD (RSpec and Minitest) throughout my career.
- **Finding and analyzing content on the web:** Much of my work has been collecting and structuring data from across the internet. At Effortless Ads, I led the design and build of a data pipeline that extracted structured information from previously unknown websites. It combined Puppeteer, proxy and CAPTCHA services, and the OpenAI API for content classification and extraction, and it ran thousands of jobs a day with about 98% success from primary sources. At Shift and MaxMilhas I also built data extraction and real-time pricing systems.
- **Payments:** I worked on the Stripe integration for campaign payment flows at Effortless Ads. As CTO of BDS Turismo, I integrated three credit-card gateways and boleto billing, and designed the full financial cycle of purchases, sales, refunds and accounting.
- **Large-scale systems:** At Drip (100–150M email/SMS events per month), I found the root cause of intermittent failures affecting millions of messages. It was a thread-safety issue under Sidekiq, and I fixed it by moving those workloads to Resque.
- **Architecture and leadership:** At Effortless Ads, I translated product requirements into architecture and technology decisions and mentored developers. At BDS Turismo, as CTO, I led a small team and built the company's platform from scratch. That experience is relevant to the growth path toward Director or VP of Engineering that you mention.
- **Frontend:** I have built React portals and dashboards in production.

On work authorization: I'm a Brazilian citizen and I'm not currently authorized to work in the United States. Relocating to the US is something I would welcome. If Redflag sees a good fit, I would be glad to explore sponsorship and am fully committed to going through that process.

Thank you for your time and consideration. I look forward to speaking with you.

Sincerely,

Fabiano Ishiy Zaparoli
